Dear Valued Customer

The American Iron and Steel Certification EPA State Revolving Fund requires the recipients of the funds to use iron and steel products that are produced in the United States for projects for construction, alteration, maintenance, or repair of public water system or treatment works if the project is funded through an assistance agreement. North American Stainless hereby certifies that its stainless steel is produced within the United States of America as they are melted, rolled and processed within the United States. Please refer to the test certification, as it will specify the steel composition and the location where the steel is manufactured. This test certification can then be used for verification, and can be retained for documentation purposes.

Sincerely,

A handwritten signature in blue ink, appearing to read "Maria Eichelberger", is written over a light blue horizontal line.

Maria Eichelberger
